Give Flies & Mozzies the *FLICK*, naturally!

OZZIE FLY REPELLENT

Although annoying insects too, flies are a distant relative to the mozzie and so require a different formulation to keep them at bay.

While mozzies seek your blood and normally appear around dusk, flies seek moisture – that's why they so annoyingly and persistently try to find their way into your eyes, nose, ears and mouth – and who hasn't swallowed a fly – yuck!

Flies have different sensory apparatus to mozzies and so respond to different odours. Like **OZZIE MOZZIE**, **OZZIE FLY** repellent is a blend of essential oils but this time combining rosemary and cedarwood which, when combined with a naturally-based plant moisturizer, creates a 'killer' fly repellent to help ensure happy, fly-free days in the great Aussie outdoors.

Give Flies & Mozzies the *FLICK*, naturally!

OZZIE MOZZIE REPELLENT

We all know how annoying and potentially dangerous to our health they can be – those blood-sucking, biting, buzzing mosquitoes, midges, ticks, sand and march-flies.

OZZIE MOZZIE not only repels these menacing insects, it does it all naturally – and doesn't smell too bad either.

When blended together according to a special formula, **essential oils** that include eucalyptus, tea tree, lavender and spearmint (each with its own natural insect repellent qualities) they create a combined repellent that these flying pests just don't want to come near.

4 in 1 - Repels, Soothes, Fights Infection and Inflammation

It has therapeutic qualities that include:

- Antimicrobial
- Antiseptic
- Antiviral
- Balsamic
- Bactericide
- Fungicide.

Not only do they keep flies, mozzies and annoying insects at bay, any itchy or swollen bites will be soothed and eased due to the natural healing properties of **OZZIE MOZZIE'S** essential oil ingredients.
